Report	Draft - Vartry River and Lake Programme of Measures - for download			
Date	December 2008			
Project No: 39325		Document Reference: 39325/ERBD40/DG134 - S		
Version	Author	Reviewed	Checked	Date
Draft 1	AOC/AC	AGH	AOC	DEC 2008

Water Framework Directive

- ❑ The Draft River Basin Management Plan was published on the 22nd December 2008 for Public Consultation.
- ❑ This Programme of Measures accompanies the River Basin Management Plan created for the Eastern River Basin District.
- ❑ The River Basin Management Plan can be downloaded from the website, whilst more detail of the Programme of Measures is contained on the River Basin Management System which can be accessed through your Local Authority.
- ❑ The River Basin Management System is a web-based tool that assists Local Authorities to store information about the condition of their waters and the Programme of Measures for their improvement.
- ❑ For more information please visit www.erbd.ie

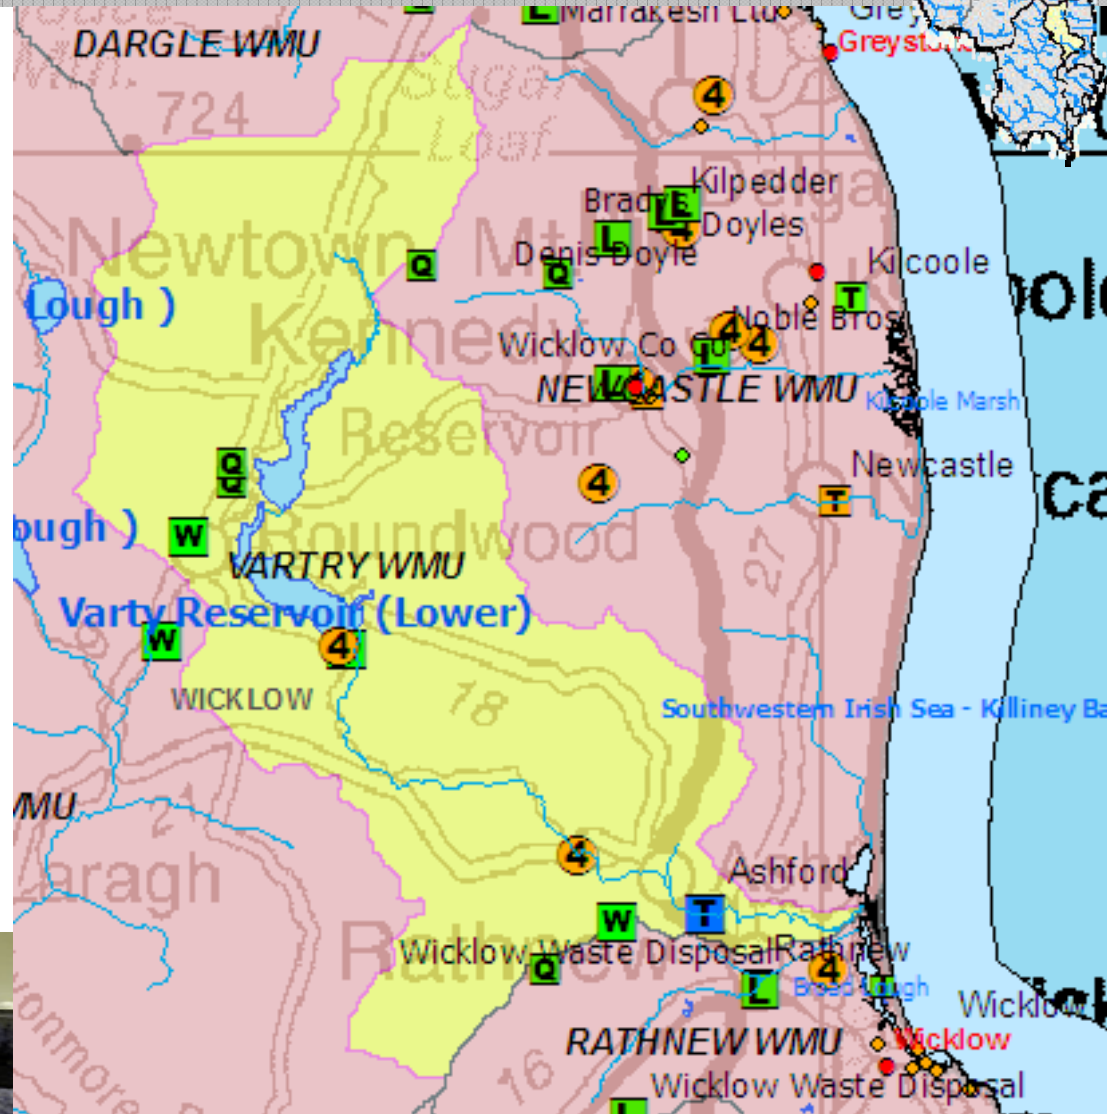

Overview of Water Management Unit

Geography

- ❑ Local Authorities: 100% Wicklow
- ❑ River Length: 20 km
- ❑ Total Lake Size: 1.6 km²
- ❑ HMWB : Vartry Reservoir Upper, Vartry Reservoir Lower, River Vartry
- ❑ Land use: Predominantly land-use is for agriculture
 - 50% pasture use, 15% arable
 - 15% Forestry
 - 20% Bog
 - urban populations cover 1% of the area for example at Roundwood and Ashford

Risk Assessment Legend

Risk	Symbol with Level of Risk	Risk	Symbol with Level of Risk
Abstraction			
CSO	 1a  1b  2a  2b	WWTPs	 1a  1b  2a  2b
Hydrometric Station	 ACTIVE  INACTIVE  OBSOLETE	WTPs	 2a
IPC Facilities	 1a  1b  2a  2b	Landfills	 1b  2a  2b
IPC Rivers	 1a  1b  2a  2b	Mines	 1a  1b  2a
Section 4	 1a  1b  2a  2b	Quarries	 2a
With 1a : At risk, 1b : Probably at risk, 2a : Probably not at risk, 2b : Not at risk			

Status of Water

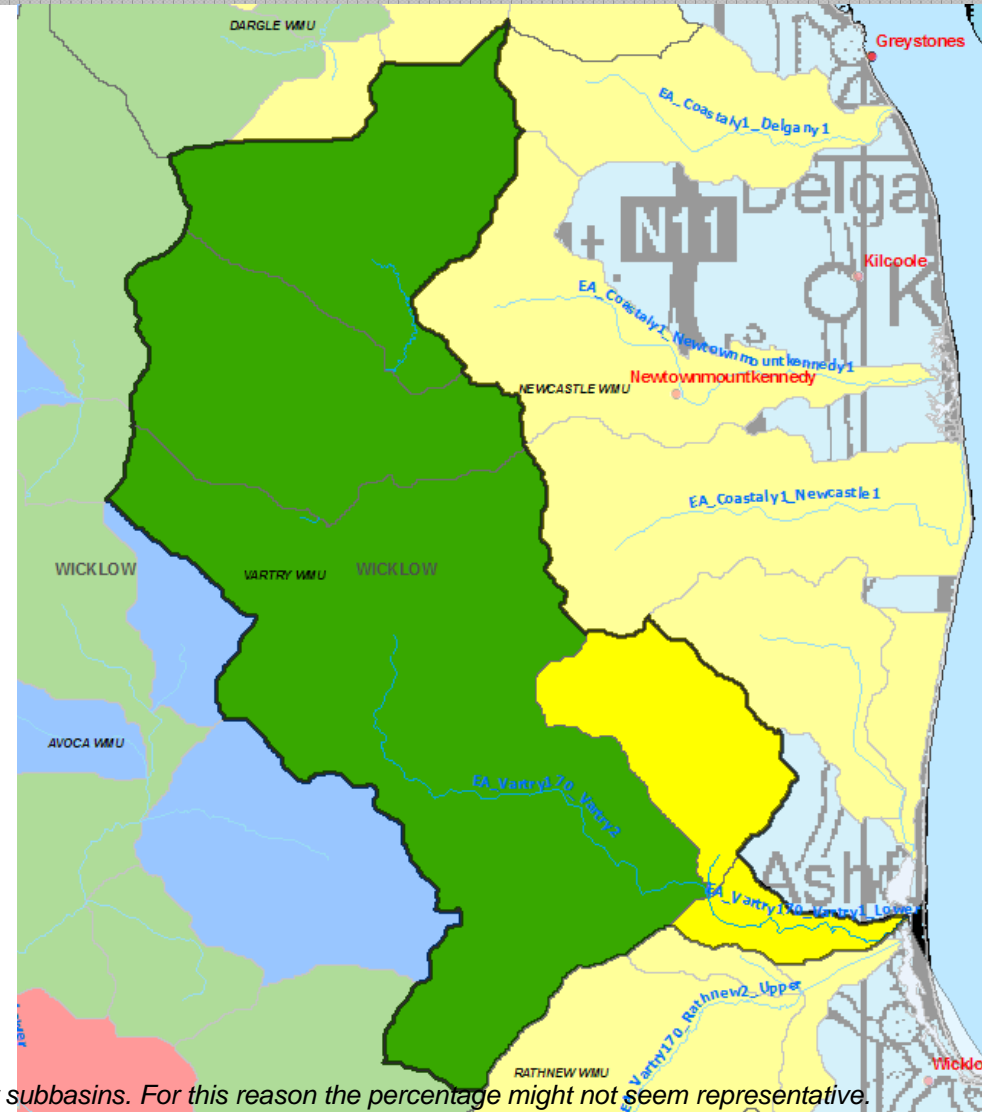

The existing condition of our waters was determined by the Environmental Protection Agency using water quality, ecology and morphology monitoring data.

River Status:

Good	75%
Moderate	25%

Lake Status:

Good	100%
------	------

The percentage status is determined by the number of reportable segments or subbasins. For this reason the percentage might not seem representative.

Objectives

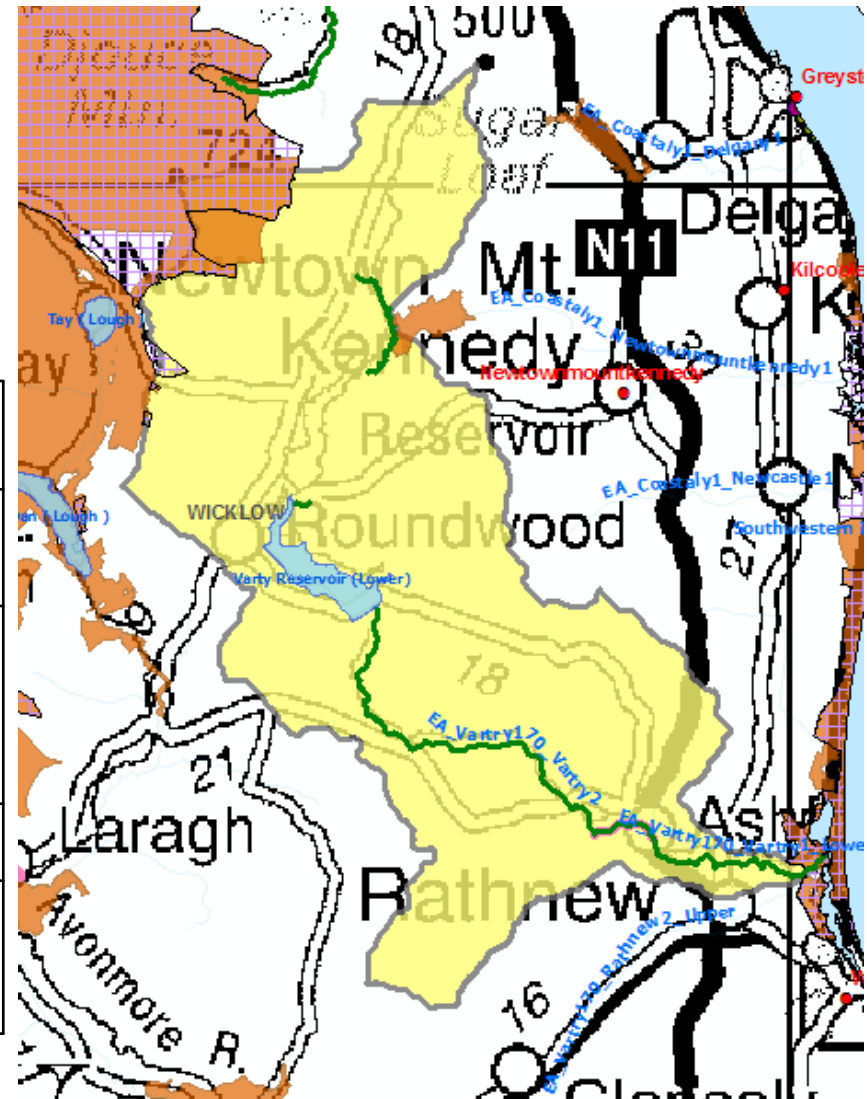

- ❑ Waters must be of satisfactory quality and sufficient quantity to protect the aquatic environment and its beneficial uses.
- ❑ We have four core objectives:
 1. Prevent deterioration and in particular maintain High or Good Status
 2. Improve waters to achieve Good Status where appropriate
 3. Progressively reduce chemical pollution
 4. Achieve our protected area objectives

Protected Areas

- Some areas require greater protection because they contain rare and vulnerable habitats or wildlife. Other protected areas are sensitive because of their beneficial use for humans, such as drinking water sources or shellfish areas.

Drinking Water (1)	✓	River Vartry
Special Protected Areas (2)	✓	Wicklow Mountains, The Murrough
Special Areas of Conservation (Habitat) (3)	✓	Wicklow Mountains, The Murrough Wetlands, Carriggower Bog, River Vartry
Salmonid Water (1)	✓	River Vartry
National Heritage Areas (5)	✓	Great Sugar Loaf, The Murrough, Carriggower Bog, Vartry Reservoir, Devil's Glen

Protected Areas Legend

Type of Protected area	Symbol
Drinking water – Monitoring point	
Drinking Water – Rivers	
Drinking Water - Groundwater	
Drinking Water – Surface water	
Nutrient Sensitive rivers	
Nutrient Sensitive Areas	
National Heritage Areas	

Type of Protected area	Symbol
Special Protected Areas	
Special Areas of Conservation	
Beaches	
Recreational lakes	
Salmonid Waters	
Register protected Areas – Water Dependant Habitats	
Shellfish	

What are the problems to address?

❑ What problems have we identified?

Low Ecological Rating

❑ What could be causing these problems?

The primary pressures causing the risk failures have been assessed as

- Wastewater and industrial discharges (27%)
- Agriculture (15%)
- Wastewater from unsewered properties (11%)
- Forestry (7%)
- Hydrology (Risk)
- Morphology (Risk)

Programme of Measures

- Having assessed the current condition of our waters, the extent of areas to protect, and the risks and pressures affecting our waters we can now determine the measures needed to bring them all back to good status.
- We must aim to achieve full implementation of all basic measures before 2015. If the implementation of all Basic Measures before 2015 will not get us to Good Status then we must necessarily select Supplementary Measures.

<i>Basic Measures</i>	Measures required by law
<i>Supplementary Measures</i>	Non-statutory measures deemed necessary

- The following pages detail the proposed Programme of Measures. We have also proposed an Alternative Programme of Measures that, in light of the large amount of measures to be taken, prioritises certain measures for the first cycle of the plan (2010 – 2015).
- ***Please see the Appendix for the full list of basic and supplementary measures selected in both the Proposed and Alternative Programme of Measures.***

Proposed Programme of Measures

This proposed Programme of Measures aims to achieve the 4 core objectives as described earlier by fully implementing all basic measures and also implementing supplementary measures where deemed necessary.

Basic Measures:

A full list of basic measures is listed in the Draft River Basin Management Plan. It includes the regulations enacted from the following 11 European Directives and also requires member states to create measures for 11 other issues:

11 European Directives

1. Bathing Water Directive
2. Habitats Directive
3. Birds Directive
4. Drinking Water Directive
5. Major Accidents (Seveso) Directive
6. Environmental Impact Assessment Directive
7. Sewage Sludge Directive
8. Urban Waste Water Treatment Directive
9. Plant Protection Products Directive
10. Nitrates Directive
11. Integrated Pollution Prevention Control Directive

11 Other Basic Measures

1. Cost recovery for water use
2. Measures to promote efficient and sustainable use
3. Protection of drinking water sources
4. Control of abstraction and impoundment
5. Authorisation of discharges to groundwater
6. Control of point source discharges
7. Control of diffuse source pollution
8. Control of priority substances
9. Control of physical modifications of surface waters
10. Controls on other activities impacting water status
11. Prevention or reduction of the impact of accidental pollution incidents

Proposed Programme of Measures - Rivers

□ Supplementary Measures (In descending order of cost):

Top Ten Supplementary Measures - River Sub-catchment
Upgrade WWTW and Collecting Systems <2000 PE
Reduce water demand through improved conservation, plumbing code changes, reduce unaccounted for water, rainwater harvesting, domestic water metering, universal water charging, or restricting development where water resources are over-subscribed
Implement Community Digestors for Alternative Energy
Alter the availability of supply through conjunctive use or integrated water resources management, water reuse, implementing S.U.D schemes in developed areas, implementation of abstraction controls, use of additional storage or alternative water source
Forest Service - Forestry and Water Quality Guidelines
Restrict Cattle Access to rivers - Create Cattle Drinking points
Inspections and Upgrades
Diffuse Runoff (Urban) - Implement SUDS
Mitigate impact of quarry activities
Further Investigate cause of failure

Proposed Programme of Measures - Lakes

- ❑ *Vartry Reservoir (Lower and Upper)*
- ❑ Basic Measures – Full Implementation of all Basic Measures (2010-2015)
- ❑ Supplementary Measures

Supplementary Measures - Vartry Reservoir Lower
Survey Banks/Coast
For sites not at Favourable conservation Status Set targets and timeframe for achieving status
Develop Guidance on suite of measures for different habitats
Conduct awareness campaign for sustainable domestic water use, including rainwater harvesting and domestic soakaways for stormwater
Modernise Abstraction Legislation, including a system for licensing surface water abstractions
Apply Heavily Modified Waterbody Measures (See External Document)

Alternative Programme of Measures – Basic Measures

We have prepared an Alternative Programme of Measures for comparison. This Programme of Measures selects the measures to prioritise for implementation during the first 6 year plan that are thought to be most effective, but still aims to achieve Good Status as early as possible

By prioritising the measures to be implemented in the first cycle, the Alternative Scenario aims to save time and money by focussing on the most effective measures first.

Phosphorus modelling by the ERBD project team shows that of the entire catchment only 37% of the Wicklow land area is of high risk of causing direct runoff into the river.

Alternative Programme of Measures

Measure	Pressure Category	% Effect
Upgrade WWTP and Collecting systems < 2000 PE (Ashford WWTP)	Physio-chemical	50%
Good Agricultural Practise Regulations	Physio-chemical	15%
Restrict Cattle Access to Rivers	Physio-chemical	5%
Inspections and Upgrades to Septic Systems	Physio-chemical	5%
Forestry Service – Forest and Water Quality Guidelines	Physio-chemical	5%
Fix Fish Impediments	Morphology	10%
Reduce impact from Abstractions	Hydrology	10%

Alternative Objectives - Heavily Modified and Artificial Waterbodies

- ❑ Some surface waters have been substantially changed in character to allow uses such as:
 - Water storage
 - Public supply
 - Flood defences
 - Land drainage.
- ❑ These waterbodies are called ***Heavily Modified***. This designation recognises that the waterbody cannot be returned to its natural condition and therefore sets an alternative objective of Good Ecological Potential.
- ❑ Some waterbodies are entirely ***Artificial*** for example canals and for the same reasoning are set the alternative objective of Good Ecological Potential.
- ❑ We must still achieve good chemical condition, prevention of deterioration and achieve our protected area objectives.

Heavily Modified and Artificial Waterbodies Status and Measures

Heavily Modified

Vartry Reservoir Upper

- Reason for designation: Impoundment for drinking water supply
- Status: Meets equivalent potential standard
- Measures: None identified

Vartry Reservoir Lower

- Reason for designation: Impoundment for drinking water supply
- Status: Meets equivalent potential standard
- Measures: None identified

Measure for River downstream of HMWB:

- Set Compensation flow (without negative impacts to drinking water supply)

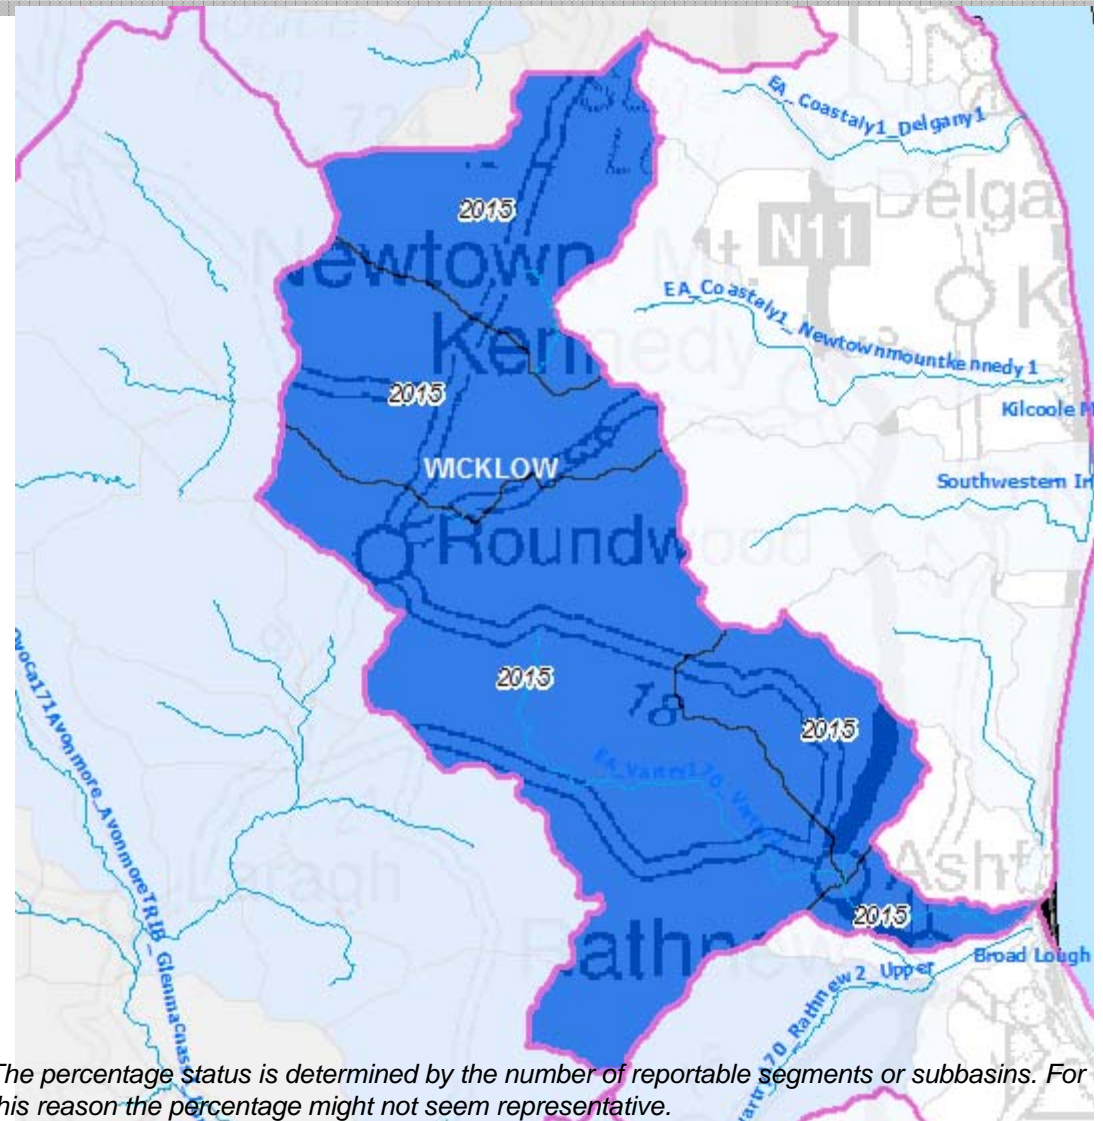

Heavily Modified and Artificial Water Bodies Legend

Heavily Modified (HM) or Artificial Water Bodies (AWB)	Symbol
HM - Rivers	
HM - Marine	
HM - Lakes	
AWB - Canal	
AWB - Reservoirs	

Objectives – Date of Achievement

- ❑ In some cases due to technical infeasibility, disproportionate cost, the natural condition of the waterbody or new physical modifications it may not be possible to achieve all core objectives by 2015.
- ❑ The main pressure preventing achievement of Good Status is thought to be diffuse agricultural pollution and wastewater and industrial discharges. Full implementation of the measures is expected to correct this, hopefully all rivers will have achieved Good Status in 2015.

2015	100%
2021	100%
2027	100%

The percentage status is determined by the number of reportable segments or subbasins. For this reason the percentage might not seem representative.

What can you do?

You have your say!

- Now is your chance to have a say on the Programme of Measures:
 - Have all issues been addressed?
 - Do you have any measures to add to the proposed Programme of Measures?
 - What do you think about the Alternative Programme of Measures?
 - Would you spend more to achieve our goals faster?

- We can all help to implement this important legislation by thinking about our impact on the water environment in our everyday lives.

How to comment

Please *have your say* in any of the following ways:

1. Email your comments to comments@erbd.ie and include River Basin Management Plan Comments in the subject line

2. Write to:
